### John McGrath Speaks In Parramatta

There are certain business leaders whose reputations precede them and the opportunity to hear them share their views on business often too judicious to pass up. This coming Friday, 26th June, at a lunch promoting the Suncorp Western Sydney Awards for Business Excellence being held at Parramatta RSL Club, Mr John McGrath, Chief Executive of McGrath Estate Agents, will share his views on peak performance strategies and the maximising of success.

Business people and managers can experience a phalanx of new trading realities and obstacles all at once, clouding their vision and affecting the day to day effectiveness of their organisation, especially when meeting challenges such as today's.

Therefore I encourage all business operators and managers to consider attending this vital address by one of the most influential figures in Australian business. Additionally, these events are wonderful vehicles for networking and making influential contacts.

As Chief Executive of McGrath Estate Agents, John McGrath took the company from a start-up in 1989 to one of Australia's largest property services groups. In 1999, the company became the first real estate company to be ranked on BRW's Australia's Fastest-Growing Private Companies List.

It is this passion for business success, as exhibited by Mr McGrath, that the Suncorp Western Sydney Awards for Business Excellence search for, recognise, reward and stimulate a focus on. The Awards organising committee, in

asking Mr McGrath to address a 2009 Awards promotional lunch, felt that businesses in western Sydney could benefit from the wisdom gained from his success, whilst exhibiting the attributes this year's Awards will be seeking.

To enquire as to the availability of seats for this lunch and John McGrath's address, contact the Parramatta Chamber of Commerce on 9683 6655, or visit [www.parramattachamber.com.au](http://www.parramattachamber.com.au) or [www.businessexcellenceawards.com.au](http://www.businessexcellenceawards.com.au) without delay.
